Subject: Friday Animas Posts

I refreshed some of the content we didn't use yesterday b/c we don't have a new report to reference – also I wanted to highlight the containment ponds, that's a step in the right direction.

This is from yesterday – vague on timing so whether we get another update or not it's still good:

We're posting the latest information on the Gold King Mine spill, including response efforts, background information, local efforts and how to file a claim for damages here.

LINK: <http://www2.epa.gov/goldkingmine>

LINK TITLE: Emergency Response to August 2015 Release from Gold King Mine

LINK DESCRIPTION: Information including community-level news and daily updates.

We're posting the latest information on the [#AnimasRiverSpill](#), including background info and local updates here: <http://www2.epa.gov/goldkingmine>

I updated this to add in the new content we posted:

@Administrator Gina McCarthy visited Colorado Wednesday to meet with officials and community members. Read her remarks, see photos and hear a press conference here.

LINK TITLE: Emergency Response to August 2015 Release from Gold King Mine

LINK DESCRIPTION: Information including community-level news and daily updates.

.@GinaEPA visited Colorado Wednesday to meet with officials and community members. Remarks, photos and audio: <http://www2.epa.gov/goldkingmine/epa-administrator-gina-mccarthy-8112015-remarks-gold-king-mine>

On the flow control:

We're working to contain the leak and the flow from the mine is now under control – water coming from the mine is being diverted into containment ponds where it will be treated.

Would we ever retweet something like this? Video of trout monitoring from CO Parks&Wildlife:

<https://twitter.com/COParksWildlife/status/630868610706092035>
